

How is the Helios OptiMax better than a traditional full height turnstile?

- Higher security achieved through tailgate detection and notification.
- ADA and egress compliant.
- Faster Throughput equivalent to multiple lanes of full height turnstiles.
- Smaller footprint.
- Lane width accommodates deliveries and workers carrying tools and equipment.
- Eliminates the need for low security full height pedestrian gates.

Helios OptiMax

Outdoor Barrier Turnstile

Common Applications

- Outdoor construction security applications
- Replacing Traditional Full Height Turnstiles and Pedestrian gates
- Outdoor applications where high throughput is required
- Outdoor applications where higher security is required with detection and notification capabilities

IP 44 Outdoor Rated

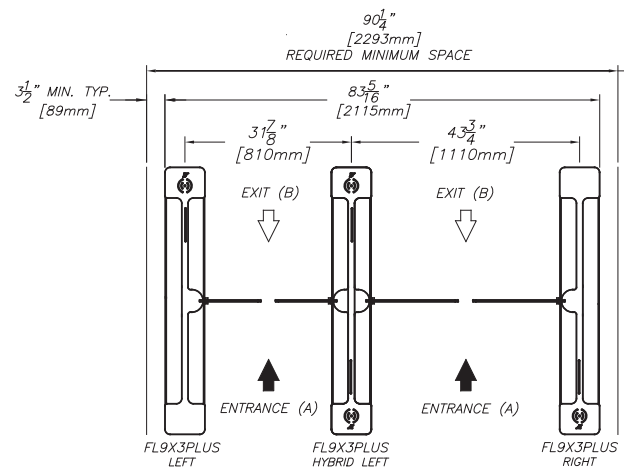

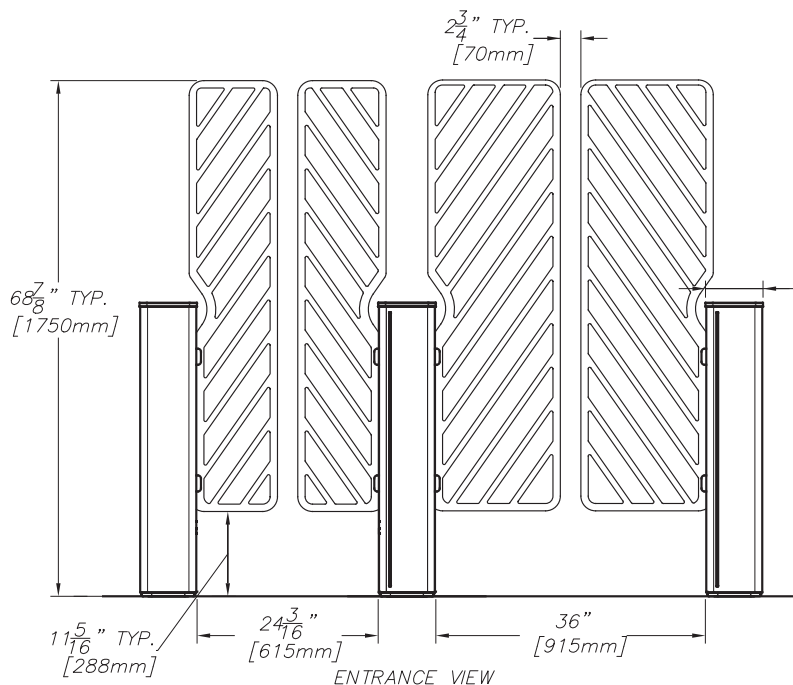

Elevate your access control with the Rizon OptiMax Optical outdoor rated Turnstile, engineered for seamless security and user convenience. This state-of-the-art turnstile features a high-density matrix of infrared beams that meticulously tracks user progression through the lane, ensuring accurate monitoring and enhanced safety. Equipped with dynamic and predictive algorithms, the OptiMax excels in fraud detection, effectively identifying and preventing tailgating and piggybacking attempts. This intelligent system not only safeguards your premises but also promotes a streamlined flow of authorized personnel. The sleek cabinet design offers ample space for the integration of various authentication peripherals, including RFID, QR code, and barcode readers, making it a versatile solution for diverse security needs. Additionally, the outdoor rated turnstile supports biometric devices, allowing for even greater precision in user verification.

TECHNICAL SPECIFICATIONS

Standard OptiMax Dimensions

Specs:

IP44 Water Resistant. Unit
heating options available for cold
climates. 12 Month Warranty,
extended Warranty options
available
