

Pegasus 200 GB-HD

Containerized Unit With Full Height Turnstile

Common Applications

- Perimeter control/fence line security
- Time and attendance integration
- Loss prevention
- Employee and visitor access control
- Unmanned point of entry
- Single-direction traffic control/one-way exiting

The Rizon Pegasus 200 GB HD is a rugged, all-in-one access control solution engineered for high-traffic, high-security environments. Built from a converted 20-foot shipping container, this durable unit combines functionality, portability, and climate-controlled comfort in one compact footprint.

On one side, the Pegasus 200 GB HD features a tandem full-height turnstile, allowing efficient, bi-directional access control for personnel. Designed for durability and security, the turnstile ensures controlled entry and exit, making it ideal for construction sites, industrial facilities, event grounds, and secure perimeters.

The other half of the container is transformed into a fully enclosed guard shack, equipped with built-in glass windows for visibility, climate control (AC and heat) for year-round comfort, and sufficient space for security personnel and monitoring equipment. The smart layout maximizes interior usability while maintaining a small site footprint.
