

Pegasus 800 HD

Containerized Unit With Full Height Turnstiles

Common Applications

- Perimeter control/fence line security
- Time and attendance integration
- Loss prevention
- Employee and visitor access control
- Unmanned point of entry
- Single-direction traffic control/one-way exiting

The Rizon Pegasus 800 HD is an innovative, shipping container-based solution designed to enhance security and streamline access control. This expertly converted container houses four tandem full-height Helios 200 turnstiles, providing a robust and efficient means of regulating entry and exit. Its compact yet functional design makes it ideal for environments where space is limited but security is paramount.

The container features roll-up doors to ensure a secure, sealed environment during off-hours, effectively deterring individuals from lingering or accessing the interior when not in use. The strategic layout of the turnstiles within the container allows for smooth, high-volume traffic flow, while maintaining strict control over access points. This versatile, rugged system is perfect for applications in high-security areas such as industrial sites, event venues, or remote facilities where reliable entry control is needed in an easily deployable format.
