Non-Penetrating Baseplate for Optical Turnstiles

Our custom non-penetrating baseplates are the first mounting system for universally all optical turnstiles in the world and include enclosed cable runs, eliminating the need for anchoring, trenching, or stubbing up conduit from the floor. With a highly textured, powder-coated passageway these baseplates are slip resistant and allow for a safe transition from the elements into historical buildings, government facilities, and more. Multi-lane configurations are available for ADA compliance while meeting building codes and standards. Custom color options are available.

Typical Installation Sites

- Government Facilities
- Corporate Lobbies
- College Campuses
- Historical Buildings
- Distribution Centers

Key Features

- Enclosed cable runs
- Allows users to bring power and communication through the side of the plate, rather than underneath
- Highly Textured powder coated for extended wear
- ADA passage width & multi-lane configuration available
- Meets building codes and standards
- Low profile
- Anti-Slip coated walkway
- 4 corner holes for Main Baseplate optional floor anchoring. 2 holes for Expansion Plate * See optional anchoring installation notes below*
