## PEGASUS MAX

Portable Optical Turnstile

### Common Applications

- Security Checkpoints
- Property Protection
- Employee and Visitor Access Control
- Ticket Booths
- Property Surveillance

The Pegasus Max Portable Optical Turnstile is an innovative new product in the world of Portable Turnstiles. Built with securing construction sites in mind, the Pegasus Max brings the benefits of Optical Turnstiles to outdoor portable applications. It is especially ideal for situations where construction site workers need to bring tools through secured entry checkpoints. With its advanced optical detection technology, the Pegasus Max can differentiate between authorized personnel and unauthorized access attempts, even when workers are carrying bulky equipment or toolboxes.

### Key Features:

- Intelligent anti-tailgating and anti-crawl detection
- High throughput capacity
- Real-time notifications with access attempts
- Roll up doors
- 10 ft container shipping container form factor with fork pockets
