

ANTI-CLIMB

Climb Over Prevention

Common Applications

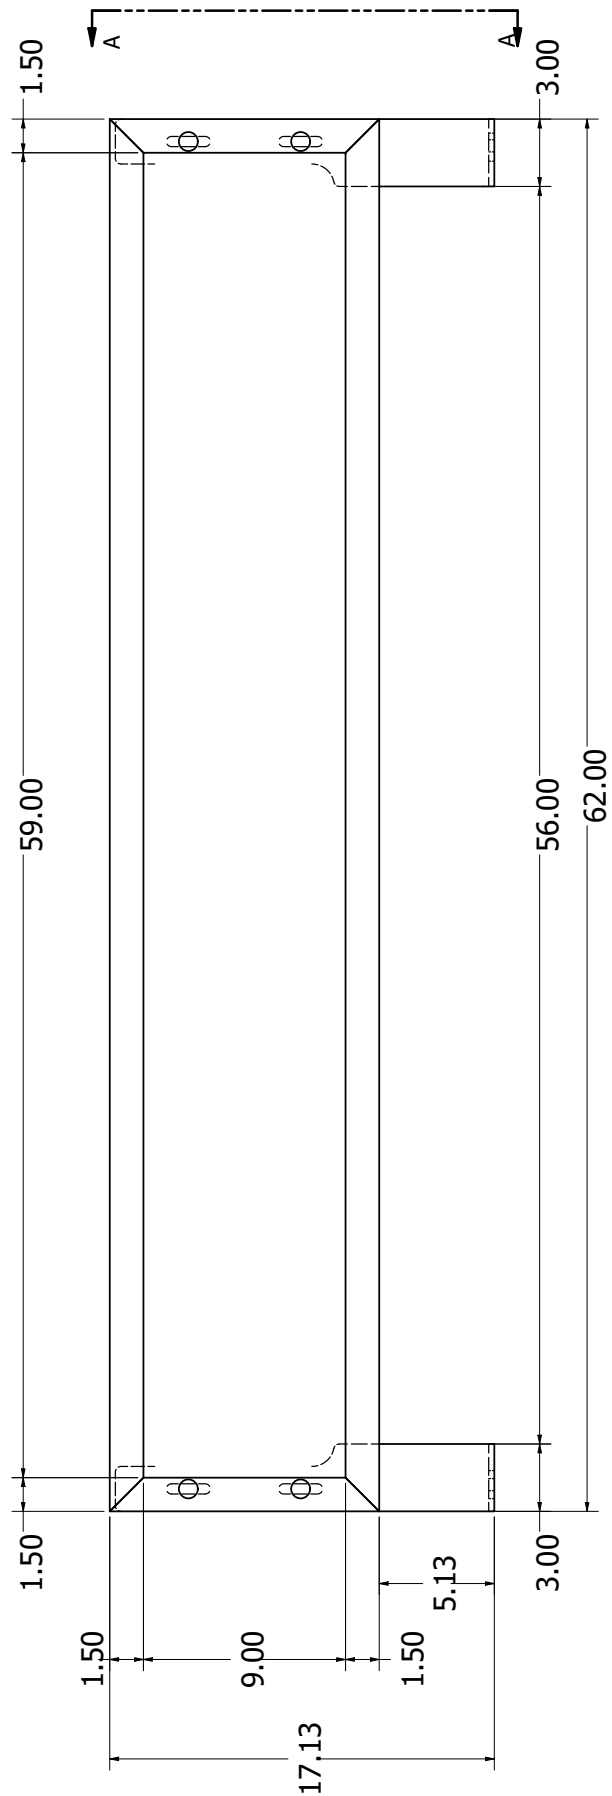

- Perimeter access control and fence line security
- Theft and Intruder Prevention
- Inside and outside locations
- Climb Over Prevention

Features

- Integrates directly with the turnstile, no wall mounting required.
- Optional brackets for different sizes available.
- Multiple finishes available.

Introducing the Rizon Anti-Climb, an innovative solution crafted for robust security and streamlined access control. Engineered with durable steel, and optional finishes, this metal plate stands as a formidable barrier against unauthorized entry attempts over full-height turnstiles. Designed to be seamlessly mounted above the turnstile, the Rizon Anti-Climb serves as a reliable deterrent, preventing any unauthorized individuals from bypassing security measures and ensuring stringent access control protocols are upheld. With its combination of strength and sophistication, the Rizon Anti-Climb provides peace of mind and heightened security for any facility.
